DETAILED ACTION

Allowable Subject Matter

1. Claims 20-27, 38 and 40-43 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. **As per claims 20, 38, 40, 41, 42 and 43 and dependent claims 21-27**, the examiner found no reference in the prior art that disclosed or made obvious a method comprising the step of detecting radiation transmitted through an object at angular positions at different spatial resolutions to create a two-dimensional radiation transmission data as recited in independent claims 20, 38, 40, 41, 42 and 43.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

First projection data are then acquired from the examination zone (3) in a first mode of operation of the X-ray image intensifier (2) which involves a low resolution. For a sub-zone (4) of the examination zone (3) second projection data is acquired in a second mode of operation of the X-ray image intensifier (2) which involves a high resolution. Subsequently, the first and second projection data is combined so as to form third projection data. The third projection data is represented by the second projection data in the sub-zone (4) of the examination zone (3) and by the first projection data in the remaining part (3a) of the examination zone (3). The images are reconstructed on the basis of the third projection data. The invention also relates to a corresponding X-ray device, notably a C-arm X-ray device.
